

FOR IMMEDIATE RELEASE

VJ Electronix Opens New Customer Center in Southern China

August 2012 — VJ Electronix, Inc., the leader in rework technologies and global provider of advanced X-ray inspection systems, announces the opening of its new customer support and demonstration center in Shenzhen, China.

VJ Electronix' new Shenzhen customer center shown with the latest SRT Micra rework and Vertex Series A X-ray inspection systems.

The new customer support center is strategically located within China's Guangdong province. Shenzhen is home to countless multinational and domestic electronic manufacturing service (EMS) providers and original

equipment manufacturers (OEMs). Residing close to electronics manufacturing companies, the VJ Shenzhen Customer Center provides enhanced regional support with immediate access to key technical resources and critical equipment components.

The center offers all levels of rework and X-ray training plus provides assistance with process development of advanced applications like Package-on-Package (PoP), micro-passive, fine-pitch area array, micro-scavenging, RF shielding and conducts defect analysis using VJ's latest imaging technologies.

The new VJ Shenzhen customer center showcases:

The **SRT Micra** mobile products rework system is a benchtop specifically designed to rework the latest high density electronics found in Smartphones, Tablets, eReaders, video / voice recorders and other small form factor products.

The **Summit 1800** performance rework system offers the most innovative features that have been developed for surface mount and microelectronics rework.

The **Vertex Series** semi-automatic X-ray inspection platform is a robust, production ready, proven X-ray inspection system that offers superior uptime and unmatched performance-value.

For more information, visit www.vjelectronix.com or feel free to stop by one of the customer centers for a demonstration of world-class rework or X-ray solutions.

###

About VJ Electronix

VJ Electronix, Inc., a VJ Technologies company, manufactures production ready, automated Rework and X-ray inspection systems with advanced capabilities. The company frequently provides custom features tailored to satisfy specific application requirements. VJ Electronix is a worldwide leader in X-ray Inspection and Rework solutions.
