

FOR IMMEDIATE RELEASE

VJ Electronix, Inc. Expands its Presence in China

May 2011 — *VJ Electronix, Inc., a leader in rework technologies and global provider of X-ray inspection systems, announces that it has moved into a new, larger facility in the Suzhou Industrial Park near Shanghai, China. The grand opening of the facility was well attended with more than 25 VIPs, including local government officials.*

The new 1500 m² building is part of the combined VJ Technologies China corporate infrastructure. The facility, which has recently been registered for ISO 9000, houses the VJ Electronix China sales office, support center and manufacturing, as well as VJ Technologies' engineering, production, inspection services, and X-Ray source manufacturing.

According to VJ Electronix China Regional Sales Manager, Vincent Wu, "Our new updated facility gives us the space to grow with the China market, as well as the rest of the world. Our 25 m² applications lab is equipped with two Summit rework systems, a Vertex X-ray machine, and our new SRT Micra rework platform, giving us full rework and inspection capability."

VJ Electronix first established its China sales office within the original VJT facility in 2006. Soon after, in 2008, VJ Electronix opened its Applications Lab. Production of the Vertex X-ray moved to Suzhou in 2010. Further expansion of Suzhou-based manufacturing is planned in an effort to better serve the needs of the local customers and improve lead times.

About VJ Electronix, Inc.

VJ Electronix, Inc. manufactures production ready Rework and X-ray inspection solutions with many advanced capabilities. The company also provides custom Rework and X-ray solutions tailored to satisfy specific application requirements.
